

BusinessObjects Enterprise XI R1/R2: Designing and Deploying a Solution – Windows (Rev A) SA410R2

Course Description

This two-day instructor-led course gives you the skills and knowledge required to design and deploy a BusinessObjects™ Enterprise system. Through hands-on activities and instructor demonstration, you will analyze customer requirements, and design architecture and a system management plan to meet the customer's needs. Based on the design, you will deploy the solution in a classroom environment. You'll also learn how to migrate system content from one environment to another.

In addition, you'll benefit from more in-depth exposure to the mechanics of a BusinessObjects Enterprise system and a careful review of the factors that can impact system performance. The course is structured to you fine tune your deployment and get the most out of your system.

BusinessObjects XI R1 and BusinessObjects XI R2

In order to accommodate both XI R1 and XI R2 audiences, this course addresses the functionality of XI R1 while identifying XI R2 content using the BusinessObjects XI Release 2 to help you differentiate between the content that does not apply to XI R1 audiences.

Course Audience

The target audience for this course is system architects/administrators who are responsible for designing and deploying BusinessObjects Enterprise across their organization.
